

Dabrowskis Theory of Positive Disintegration

Kazimierz Dabrowski's Theory of Positive Disintegration (TPD), which includes the widely known overexcitabilities, is one of the most influential theories in gifted education. This groundbreaking book, edited by Dr. Sal Mendaglio, brings together leading professionals, many of whom knew Dr. Dabrowski himself, and provides readers with a diversity of perspectives on TPD. It summarizes the research and application of TPD, as well as compares it to other theories of personality and psychological development. Dabrowski's Theory of Positive Disintegration is a thought-provoking book that provides powerful insights and information not previously published about Dabrowski's theory.
