

Exploring Energy & Alternative Energy Technologies and Issues: Resource Guide for the Gifted Middle and High School Classroom

Just Published! September 2010. Comprehensive Resource on Energy Conservation and Consumption. Specifically Written for Use in the Gifted Classroom. ABOUT THE AUTHOR -- Harry T. Roman is a Technology and Environmental Engineer. He is an unusual blend of writer, teacher, inventor and engineer, having achieved acclaim in all four categories. His freelance educational writing appears in Highlights for Children, TechDirections, Interface, Teaching K-8, and The Technology Teacher. I recommend this excellent technology and science work for all gifted students! The numerous exercises and detailed information will help them understand current issues related to energy resources and use. Dr. Michael E. Walters Gifted Education Author Tuoro College New York City
