

The Execution Premium: Linking Strategy to Operations for Competitive Advantage

In a world of stiffening competition, business strategy is more crucial than ever. Yet most organizations struggle in this area--not with formulating strategy but with executing it, or putting their strategy into action. Owing to execution failures, companies realize just a fraction of the financial performance promised in their strategic plans. It doesn't have to be that way, maintain Robert Kaplan and David Norton in *The Execution Premium*. Building on their breakthrough works on strategy-focused organizations, the authors describe a multistage system that enables you to gain measurable benefits from your carefully formulated business strategy. This book shows you how to: Develop an effective strategy--with tools such as SWOT analysis, vision formulation, and strategic change agendas; Plan execution of the strategy--through portfolios of strategic initiatives linked to strategy maps and Balanced Scorecards; Put your strategy into action--by integrating operational tools such as process dashboards, rolling forecasts, and activity-based costing; Test and update your strategy--using carefully designed management meetings to review operational and strategic data; Drawing on extensive research and detailed case studies from a broad array of industries, *The Execution Premium* presents a systematic and proven framework for achieving the financial results promised by your strategy.
