

Introduction to Plasma Physics and Controlled Fusion

This complete introduction to plasma physics and controlled fusion by one of the pioneering scientists in this expanding field offers both a simple and intuitive discussion of the basic concepts of this subject and an insight into the challenging problems of current research. In a wholly lucid manner the work covers single-particle motions, fluid equations for plasmas, wave motions, diffusion and resistivity, Landau damping, plasma instabilities and nonlinear problems. For students, this outstanding text offers a painless introduction to this important field; for teachers, a large collection of problems; and for researchers, a concise review of the fundamentals as well as original treatments of a number of topics never before explained so clearly. This revised edition contains new material on kinetic effects, including Bernstein waves and the plasma dispersion function, and on nonlinear wave equations and solitons. For the third edition, updates was made throughout each existing chapter, and two new chapters were added; Ch 9 on "Special Plasmas" and Ch 10 on Plasma Applications (including Atmospheric Plasmas).

Introduction to Plasma Physics and Controlled Fusion : Francis F Chen is a plasma physicist with a career extending over 61 years and are familiar with his textbook Introduction to Plasma Physics and Controlled Fusion. Introduction to Plasma Physics: Francis F. Chen: 9781475704617 Introduction to Plasma Physics and Controlled Fusion, 2nd Edition by Chen Francis F., 9788181288028, available at Book Depository with free delivery

Fundamentals of Plasma Physics and Controlled Fusion With the current increase in interest in controlled fusion and the wide spread use of plasma physics in space research and relativistic astrophysics, it makes

Introduction to Plasma Physics and Controlled Fusion - Goodreads The third edition of this classic text presents a complete introduction to plasma physics and controlled fusion, written by one of the pioneering scientists in this
