

Connecting Mathematical Ideas: Middle School Video Cases to Support Teaching and Learning

Connecting Mathematical Ideas contains two-CDs worth of video case studies from Humphreys own middle-school classroom that show her encouraging students to bridge complex mathematical concepts with their prior knowledge. Replete with math talk and coverage of topics like representation, reasonableness, and proof, the CDs also include complete transcripts and study questions that stimulate professional learning. Meanwhile, the accompanying book guides you through the CDs with in-depth commentary from Boaler and Humphreys that breaks down and analyzes the lesson footage from both a theoretical and a practical standpoint.

Connecting Mathematical Ideas: Middle School Video Cases to Support Teaching and Learning / Edition 1. by Jo Boaler, Cathleen Humphreys, Deborah
