

Diving In to Strategic Thinking: A Teachers Field Guide to Depth of Knowledge

In *Diving In to Strategic Thinking*, writer Gwendolyn Leininger and veteran educator Sandra Adams team up to bring a practical understanding to Norman Webb’s *Depth of Knowledge*. With a readable style and a knack for connecting ideas and practice, Leininger and Adams bring readers into the underwater caves of the Bahamas to explore a new metaphor for strategic thinking. What they discover is a way to design rigorous lessons that push students into deep thinking and a structure for giving students the tools to take ownership of their learning. Intended for collaboration, this field guide is peppered with challenges to engage growth-minded teachers in strategic thinking about their own work. With an understanding of the challenges today’s teacher’s face, *Diving In to Strategic Thinking* functions as an accessible guide to professional learning for teachers, instructional coaches, and curriculum directors.
