

Paving the Way: Contributions of Interactive Conflict Resolution to Peacemaking

This first-of-a-kind collection brings together in one volume the strongest available evidence of successful transfer effects from unofficial third-party work to official peacemaking. Using comparative case analysis from several real-world interventions, *Paving the Way* offers insights into the conditions and qualities of successful programs of interactive conflict resolution from experts in the field. Editor Ronald J. Fisher has assembled a collection of seminal case studies that illustrate interactive approaches to conflict resolution from the Malaysia-Indonesia conflict in the 1960s to the Peru-Ecuador peace process of the late 1990s. Integrating theory, research, and practice, the cases posit that interactive conflict resolution can make a significant, and sometimes essential, contribution to the resolution of protracted and violent identity conflicts. The methods and solutions offered in *Paving the Way* will serve as best practices for those in the field and as training tools and resources for scholars and policymakers.
