

Leading By Example: A Parents Journey into Understanding and Nurturing Giftedness

Adrienne Artz, former Gifted Intervention Specialist and BA in Psychology, created Leading By Example to help parents recognize the why tos as well as to provide the how tos to look more deeply into their connection with their children. Addressed especially to parents who are struggling to help their children reach for their potential while still coping with their own unrecognized and, perhaps, unrealized potential, these 52 essays paint the pictures of the complexities of those within the gifted population and offer important questions that invite discovery and growth. Drawing on her own struggles, the challenges she encountered with her five children and those evidenced by her students, Artz emphasizes that these children are often very at risk both socially and emotionally. Passionate about the need for mindful parenting that understands and nurtures their unique characteristics, she provides a valuable, thought-provoking tool that makes the complex and often misunderstood concept of giftedness much more manageable.
