Advanced Reading Instruction for Gifted Primary Students: A Practical Guide to Challenging Resources and Activities is a tool for teachers to use in developing appropriate reading activities for high-ability students in the primary grades. The activities included in the book will be designed for teachers who would like to extend their knowledge of appropriate differentiation of reading instruction for highly able students. Areas of focus will include literary analysis and the use of informational texts (corresponds to two of the areas in the reading strand of the CCSS in English Language Arts); activities will focus on above-grade-level literature or advanced analyses of nonfiction texts and will be based on the requirements of the Common Core. Technology integration ideas will be emphasized throughout the book.
