

# History Comes Home

Teachers recognize that to succeed in school, children need to make connections between their own lives and the subjects they study. By creating a supportive classroom community and employing in-depth inquiry on a topic of real significance to students, you can help them see how school subjects provide essential tools and knowledge for their lives. The explorations of family histories developed in *History Comes Home* provides a powerful vehicle for achieving these goals in classrooms of all kinds. In this lively, step-by-step text you will find everything you need to carry out family history projects that will engage even your most reluctant students. Strategies for organizing in-depth exploration of their own heritage and activities for articulating and sharing their new knowledge are clearly explained in units that include: student-on-student pair interviews; interviewing family members; profiling and graphing classroom data; researching and assembling kinship charts; creating family and formal history time lines; making family history videos. You will learn how to promote strong writing about family history, use other expressive forms such as sketch-to-stretch, to link family history with literature and math, find Internet resources and government archives for tracing family origins, and meaningfully assess student work. Wide choices and options are described, so that all students—whatever their family make-up—can feel included. Strategies for relating family history projects to district standards and requirements allow

teachers to ensure that necessary curriculum is covered even as the strategies support students own lines of inquiry. History Comes Home will help you expand the widely-used family tree assignment into a rich and powerful part of your teaching that will strengthen your students skills in writing, research, and thinking, and help your classroom come alive with learning across the curriculum.
